

### Literacy

Use the internet or books to find some information about Space. It can be anything you want! Find some pictures and write a sentence or more on what you have learnt.

### Maths

Practice writing out all the numbers to 20. Can you begin to add numbers together to find the total?

Write down some sums and bring your work to show the class!

### Phonics

Practice reading your phonics books and look out for signs and books in the world around you, what letters can you see?

### Reception Home Learning

#### Spring Term

#### **Our Topic is: Out of this World!**

Please read the home learning grid to your child. Phonics and reading should be practiced as much as possible, but children are free to chose from the other homework topics.

We would love the children to share their home learning with us during show and tell times this term so please do bring in any photos, artwork or writing on the topics shown or show us on tapestry!

**Thank-you for your continued support!**

### Art and design

Choose a planet and use any materials (paints, papier mache, felt tips, cardboard etc.) to make your chosen planet! Think about the colours and textures that you are using. Here's an idea to get you started!

### Understanding the World

Find out information about the moon landing, print off or write some sentences about what you have found. Can you draw a picture of the first person landing on the moon? What is the name of the first person to land on the moon?
